

DSI HARDSCAPE 2011

Volume 3

The DSI difference
Message from the President

For over 45 years the Graff family has been proudly manufacturing diamond tools for construction, stone cutting and industrial applications in Canada. Like any manufacturer operating in a competitive environment our business model is constantly changing. Our industry has seen significant consolidation, some competitors have come, some have gone and we must continually adapt to the reality of a world market.

DSI stands today as the major diamond tool manufacturer in Canada and one of the very few independently owned in North America. This gives us an advantage in many ways. The manner in which we respond to our customers special requirements, build products that suit the task at hand and offer technical advice, a repair centre and the capability of providing specialty items that cannot be done by an importer. There is no such thing as an "all purpose" diamond tool or customer that is "one size fits all".

We build quality products. The raw materials are sourced only from the top players in the industry - tried and true. Our diamonds, powders and processes are second to none and we will never compromise this quality for the sake of a low price. Our state of the art brazing technology and laser weld capability insures our products last and virtually eliminate failure on site. ISO certified in 2002, our auditing committee insures we never stray from this commitment.

In short, there is a difference at DSI. We are manufacturers from start to finish. Not assemblers or importers.

On behalf of all employees at Team DSI, thank you for your business and we look forward to servicing your future needs.

Don Graff
President

DRY BLADES

GP Wizard - DSI General Purpose Blade

The GP Wizard is our general purpose blade. The GP is a fast cutting economical choice for intermittent cutting.

Pro II Laser Welded

Same high diamond concentration as the Super 10 with a .350" segment height. Outstanding performance with a lower price point, The Pro II is a true performer.

Super 10 - DSI Premium Plus

The Super 10 is our most popular selling blade. A full .400 high segment with high diamond concentration produces outstanding performance and lowest cost per cut.

VP Plus

Our lowest price point diamond blade. The VP is a fast cutting economical choice for intermittent cutting.

D'AX

A unique blade designed and engineered to cut a variety of those difficult to cut materials. Available in popular sizes to fit either portable gas saws, 7" and 8" electric hand held saws or smaller floor type saws. D'AX will slice through a multitude of applications all with the same blade.

D'AX blades don't need sharpening, simply reverse rotation and continue cutting. They'll cut in any direction and are unaffected by many perils which would ordinarily destroy normal carbide tipped blades.

SDT-1410 Dry Masonry Saw

The SDT-1410 is a dry-cutting masonry chop saw designed for brick and block jobs. Due to the large 14" blade and potent 3 HP carbon-brush motor, the unit can effectively cut blocks up to 5" thick in a single pass. Despite the saw's overwhelming power and cutting capacity, it is nevertheless one of the lightest in its class -- weighing only 75 lbs. For added versatility, the saw can be outfitted with an optional wet or dry kit to adapt the saw for use in a variety of situations.
